Biography

My research focuses on Real2Sim and Sim2Real for embodied agents.

In Real2Sim, I aim to leverage spatial intelligence models with affordable sensing systems to address generalizable human and scene understanding, enabling the acquisition of high-quality, simulation-ready data without tele-operation.

In Sim2Real, I am interested in developing behavior foundation models for robust motor control, while using world models for long-horizon planning and environment modeling, toward more general intelligence for humanoid robots.

Education

University of Hong Kong

PhD in Computer Science, supervised by Prof. Taku Komura

Jan 2023 – Aug 2026

(expected)

Tongji University

Master of Mechatronics

Sep. 2016 – May 2019

Nanjing University of Aeronautics and Astronautics

Bachelor of Aircraft Designing

Sep. 2012 – June 2016
